February 2, 2012

To Whom It May Concern:

This letter is in response to your inquiry regarding the FXI polyurethane foam of interest and RoHS. The material manufactured by FXI and sold to your company does not contain materials listed in Directive 2002/95/EC of the European Parliament and of the Council, effective as of January 27, 2003, dealing with the Restriction of the Use of Certain Hazardous Substances (RoHS) in Electrical and Electronic Equipment. This directive includes restrictions on the following materials: lead, cadmium, hexavalent chromium, mercury, polybrominated diphenyl ethers (PBDE's) and polybrominated biphenyls (PBB's). These materials are not added in our foaming process as pure materials or components of raw materials.

Please note that this information is based on information provided to us by our suppliers through the Material Safety Data Sheets for each raw material. It is therefore accurate to the very best of our knowledge.

Sincerely;

A handwritten signature in black ink, appearing to read 'D.C. Dobratz'.

Daniel C. Dobratz
Vice President – Manufacturing Technology
